Title: Copper, Lead, and Zinc of China

Author: Hu Wei-pai (胡為柏)

Publisher: Commercial Press, Shanghai, Jul 1952

Sponsor or
Issuing Authority: None indicated

No. Pages: 79

Language: Chinese

Area of Coverage: China, Northeast, Central-South, and Southwest

Subjects Covered: Copper, lead, and zinc industries, resources, and their exploitation; location and production of resources

Review: Monograph describes the historical development and uses of copper, zinc, and lead in China. Gives properties and uses of each metal, the major production areas, the estimated ore reserves and deposits in each area and for particular mines, and the mining and extraction of each metal. Gives production figures for some mines.
